Allowable Subject Matter

Claims 1-23, 25 and 27 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a monitoring system for a movable barrier. Each independent claim identifies the uniquely distinct features "a movable barrier including a network interface; wherein the network interface receives a status change request from the network client and the controller responds to the status change request by moving the barrier". The closest prior art Ginzl et al. (US 6,553,238) and Cohen (US 6,388,559) disclose conventional movable barrier controller, either singularly or in combination, fail to anticipate the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
